- Pressing the flashlight button [🔦] a fourth time will turn on the flashing mode.
- Pressing the flashlight button [🔦] a fifth time will turn off the flashlight.

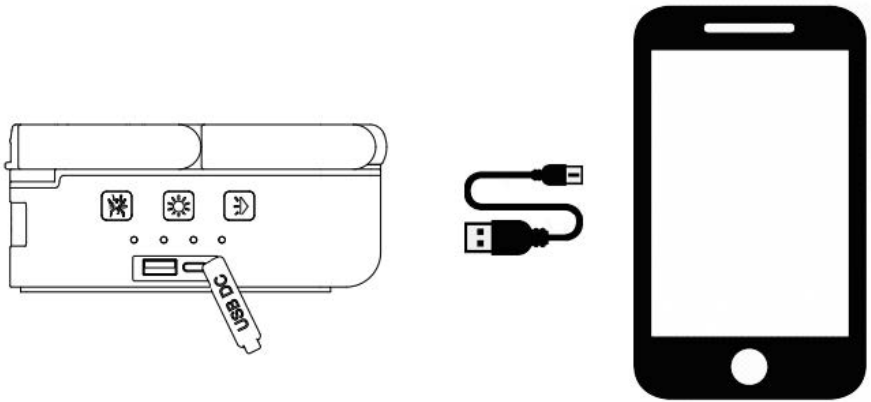

Battery Installation

- Raise the solar panel / reading light and then the handle to access the battery cover.
- Slide open the battery cover and install three C batteries.

Input and Output

- To charge the bug zapper, connect the included cable to the USB-C port on the bug zapper and to a power source.
- The USB-A port provides 5V 1.8A output. To charge another device, plug the device to the USB-A port on the bug zapper.

Power Indicator

This machine has a battery indicator light. When any function is used after being on standby, the indicator lights will show the battery level with solid blue lights and then turn off after 30 seconds. When charging, the light will flash at the corresponding battery level.

- When 1 light shows green, the solar panel is charging the bug zapper
- 4 blue lights indicate the battery level is above 75%
- 3 blue lights indicate the battery level is between 50% and 75%
- 2 blue lights indicate the battery level is between 25% and 50%
- 1 blue light indicates the battery level is between 3% and 25%
- When the first light flashes blue, the battery level is below 3%

Precautions

- Keep out of reach of children.
- When cleaning the power grid, turn the device off and remove the charging cable.
- Do not put your fingers, metal or other conductive objects into the high-voltage power grid.
- Do not rinse or submerge the bug zapper.
- If the cord or external network is damaged, please have it repaired and replaced by a professional.
- When using outdoors be cautious of leaves or debris falling into the bug zapper.
